

Vacancies exist for 2 volunteer posts in the Infrastructure Team

In addition to the more widely recognised activities of track, bridges and structures on the railway, the Infrastructure team are also responsible for many other important assets which include –

- Station buildings
- Offices and accommodation
- Sleeping coaches
- walkways
- a portfolio of rented properties
- CCTV systems
- Security & fire alarms
- The supply of services such as water, drainage, electricity and LPG

As a result of some changes in the way these responsibilities are now managed we are looking for 2 persons to work in the Infrastructure Team to help support the department's workload of general maintenance and management.

The posts would suit persons with a background in management or supervision who could help administer these responsibilities or with practical skills to actually undertake some of the jobs involved. If you have a few hours to spare each week (or month) and believe you could take on some of these responsibilities your help would be very much appreciated and you would be making a very useful contribution to the team.

If you think you may be able to help then email lisa.boyle@bluebell-railway.co.uk at Sheffield Park General Office and she will arrange for someone to contact you for a more detailed chat about what's involved.
